

Cache Peak Civic Association  
February 2011

Attending: George Darrington, Stan Lloyd, Sadie Udy, Kent Durfee, Janis Durfee

George called the meeting to order.

The calendar made a good profit with comparably little work. We should try again next year. We need to decide a theme for the next year before too long.

Stan brought a copy of the newly published book, "Elba Valley: a Brief History". He suggested that Almo publish a similar history. The members discussed the project, wondering who might be interested and motivated to take on such a large project.

A student from USU who is doing an internship with the Bear River Historical Area contacted DeeAnn and Janis about having help locating the Utah cemeteries in Box Elder County. He is particularly interested in the Junction cemetery. Stan and Janis will go on an excursion this next month to show the student the cemeteries.

It was suggested that a GPS system would probably be the best method of locating some of the historical sites in the area that are in danger of being lost or hard to find. Janis and Kent will research the choices available.

The newspaper article concerning the Commissioners' suggestion to form a new road board was discussed. The members were interested in the article since it seems to be a change from the position reported to CPCA last fall.

Road issues in Elba and Albion were discussed.

The school bond vote will be March 8<sup>th</sup>. We need to see if a member of the school board will come to the next CPCA meeting to discuss the bond issue.

The meeting was adjourned.
